

Alex Chen

Halifax, NS • alex.chen.dev@example.com • github.com/alex-chen-dev • 902-555-0194

Professional Summary

Junior Software Developer with 2 years of hands-on experience building web applications and backend services using **JavaScript**, **TypeScript**, and **C#/.NET**. Passionate about clean code, scalable design, and continuous learning. Experienced in collaborating within agile teams, contributing to full-stack features, and delivering reliable software in production environments. Known for strong problem-solving skills, curiosity, and the ability to quickly pick up new technologies.

Technical Skills

Languages: JavaScript, TypeScript, C#, SQL, HTML/CSS **Frameworks:** React, Node.js, Express, .NET 6, ASP.NET Core **Tools:** Git, Docker, Postman, Azure DevOps, Jira **Databases:** PostgreSQL, MongoDB, SQL Server **Other:** REST APIs, unit testing (Jest, xUnit), CI/CD basics, cloud fundamentals (Azure)

Professional Experience

Junior Software Developer

BlueWave Digital Solutions – Halifax, NS May 2024 – Present

- Developed and maintained full-stack features for a client-facing analytics dashboard using **React**, **Node.js**, and **PostgreSQL**, improving page load performance by 18% through optimized API queries and component refactoring.
- Built internal microservices in **C#/.NET 6**, including a notification service that integrated with SendGrid and Azure Functions, reducing manual communication tasks for the support team by 40%.
- Collaborated with senior developers to design RESTful API endpoints, implement authentication flows, and improve error-handling patterns across the backend.
- Wrote unit and integration tests using **Jest** and **xUnit**, increasing code coverage from 62% to 81% across key modules.
- Participated in agile ceremonies, contributed to sprint planning, and regularly demoed completed features to stakeholders.
- Assisted in migrating legacy JavaScript code to TypeScript, improving maintainability and reducing runtime bugs.

Software Developer Intern → Junior Developer

HarborTech Innovations – Dartmouth, NS May 2023 – April 2024

- Contributed to the development of a workforce scheduling platform using **ASP.NET Core** and **SQL Server**, implementing CRUD features, validation logic, and role-based access controls.
- Built reusable UI components in **React** and improved form handling using React Hook Form, reducing repetitive code and improving consistency across the app.
- Designed a small internal tool called **ShiftSync**, a C# console application that automated CSV imports for scheduling data, cutting manual processing time from 2 hours to 10 minutes.
- Worked closely with QA to reproduce and fix bugs, improving overall product stability and reducing customer-reported issues by 25%.
- Documented API endpoints, data models, and onboarding guides for new interns.

Selected Projects

MealMate – Personal Recipe Manager (Side Project)

A full-stack recipe management app built with **React**, **Node.js**, and **MongoDB**. Implemented user authentication, image uploads, and a search feature using text indexes. Deployed on Render with CI/CD via GitHub Actions.

TaskFlow – Team Task Board

A Trello-style task board built in **C#/.NET** with SignalR for real-time updates. Designed REST APIs, implemented drag-and-drop UI, and containerized the app using Docker.

Education

Diploma, Software Development Nova Scotia Community College (NSCC), 2023
